The effects of a global pandemic like Covid-19 are felt by everyone – both in public and private life. In order to prevent or slow down the spread, we must all take active steps to prevent the proliferation and spreading of aggressive viruses and bacteria. With a view to driving this forward and making measures as easy as possible to implement, we have compiled a number of helpful solutions for hygiene protection. Let's get active together!

# SPACE-SAVING INDIVIDUAL CREATIVE

**FOR MORE VARIETY IN DESIGN**

Our systems provide space-saving solutions to create separate workspaces in an open-plan office. Whether they are used as simple partition walls or for construction of separate meeting rooms, they not only offer more privacy but also the possibility of customization to suit your specific needs and preferences. Choose your own design and colour scheme to create a unique, friendly and motivating environment.

In the same manner, our partition walls allow you to easily separate your home office from your living space. Aesthetically pleasing, they provide yet another significant advantage: shielding and protection of your employees while permitting an efficient workflow despite strict safety requirements, for example during a pandemic.

Hygiene protection with functional opening.

Our modular system constantly adapts to new requirements.

## Reception Areas

Acrylic glass ensures that partition walls are not the focus of perception.

**Make your customers feel safe right from the the start.** Especially in the reception area many different people come and go throughout the day. This constant stream of visitors can be managed safely by means of our protective walls with acrylic glass fillings, which adapt perfectly to furniture and rooms.

**BUILDING  
CONFIDENCE  
AT THE FRONT DESK.**

Partition walls create individual workspaces and ceiling mounted light frames provide uniform illumination.

## Workspaces

Round ceiling lamps are a perfect fit for individual workstations.

### **Your own workspace. For concentrated work.**

Partition walls don't have to look boring. Quite the opposite: With free forms and curves an open space can be cleverly converted into a modern office. Printed with individual graphics, the tensioned fabrics can even be used as a pinboard.

A wide variety of fabrics can be inserted into the fabric groove: from acoustic insulation mesh to antibacterial fabrics.

## Workspaces

Different materials can be easily combined

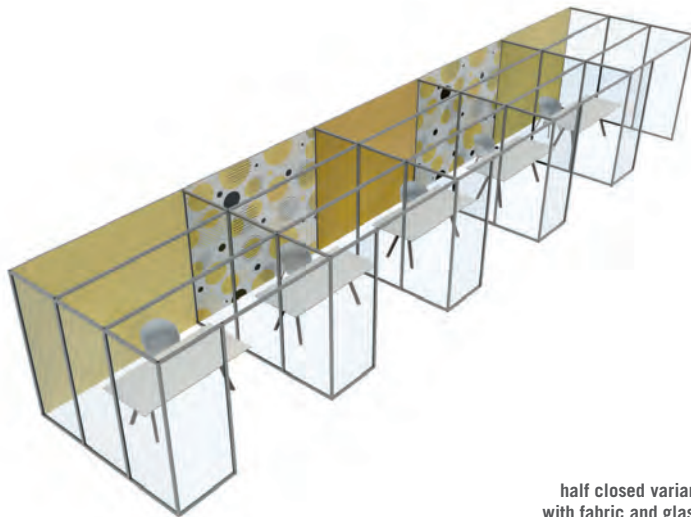

### **Flexible equipment: panels, glass or fabrics.**

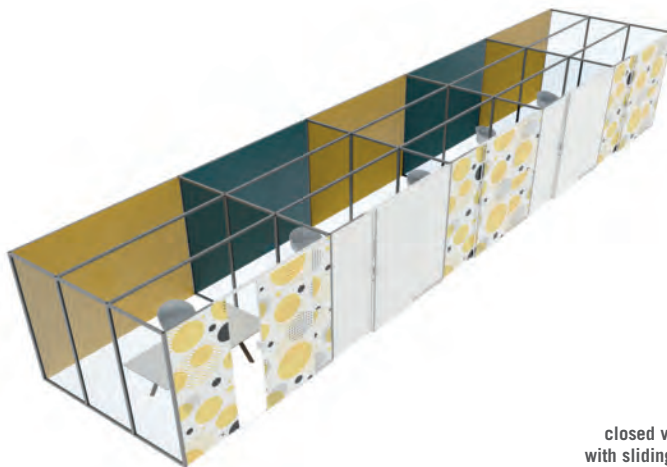

Depending on the type of application, different materials can be used. Opaque panels ensure undisturbed working. Acrylic glass allows concentrated work while also supporting the team spirit as colleagues remain in the field of vision. And fabrics cannot only be printed creatively with individual motifs but may also have a sound-absorbing or antibacterial effect.

## Workspaces

Shielded communal areas

For video conferences: separating workspace from living space

Cladded partition walls for a feel-good atmosphere

### **Effective working from home.**

Your home may not be perfectly designed for the creation of an individual workstation. In order to keep disturbing noises from other family members or flatmates who are also working from home as low as possible, workplaces can be separated with partition walls here too. Less distraction - and more concentrated working. In addition, a back wall provides more privacy during video conferences by concealing the living area.

## HOME OFFICE AND LIVING ROOM SEPARATED.

Fully separated rooms offer space for meetings

**CREATE A  
PLEASANT  
ATMOSPHERE.**

# OFFICE AND BUSINESS EQUIPMENT

## Meeting Rooms

Small meeting room cabins with sliding doors can also be equipped with acoustic fabric.

### **Active noise level reduction.**

Countless phone calls, conversations and meetings may lead to a drastic increase in noise levels. To counteract this effect, our meeting cubicles are equipped with sliding doors to close the room. In addition, the frames can also be fitted with acoustic fabrics to further reduce the sound and improve acoustics.

measures  
within  
meetings

## GOOD IDEAS AND CREATIVE BRAINSTORMING SAFE AT ONE TABLE.

### **Variable solutions for large meetings.**

The modular design is perfectly suited for short-term adjustments. Depending on the number of participants, additional modules can be mounted without much effort. Flexibility and safety at the highest level.

# "TOGETHERNESS" DESPITE RESTRICTIONS.

Creating a safe  
communal area

# OFFICE AND BUSINESS EQUIPMENT

## Cafeterias

### **Cafeterias: providing protection in confined spaces.**

Highly frequented rooms such as cafeterias and canteens require special protective measures to ensure the safety of each individual. By means of our tabletop partitions with acrylic glass, separate dining areas can be created without preventing personal interaction.

Space dividers allow cafeterias to be used even under strict hygiene requirements.
